ABOUT ME

WordPress Developer with 5+ years of experience building responsive,high-performing websites for SMBs, startups, and content-driven brands. Skilled in converting Figma designs into fully functional websites, optimizing performance and SEO, and delivering user-focused digital experiences that convert visitors into customers. Open to WordPress development, front-end engineering, and UI/UX roles, remote or Johannesburg-based.

WORK EXPERIENCE

RightMediaTech

WordPress Web Developer

2024 - Present

- Designed and launched 10+ custom WordPress websites using Elementor and bespoke themes, achieving an average 95+ Google PageSpeed score.
- Improved organic search visibility by implementing technical SEO, contributing to a 35% average increase in monthly site traffic within 90 days.
- Reduced site downtime to near-zero through automated backups, security hardening, and structured plugin update workflows.
- Managed end-to-end projects independently from domain/hosting setup through deployment and handling client timelines and deliverables.
- Integrated Google Analytics, contact forms, and CRM plugins, giving clients actionable visitor data and lead capture from day one.

Biconcepts

WordPress Web Developer

2022 - 2024

- Built responsive page layouts and interactive front-end components for 15+ client websites using WordPress, HTML, CSS, and JavaScript.
- Collaborated with designers and back-end developers, shipping features on a two-week sprint cycle, reducing delivery time by 20%.
- Improved Core Web Vitals across the portfolio by optimising image delivery, caching, and plugin load order.
- Maintained and troubleshot 10+ active client sites with an average resolution time under 4 hours.

Gudworks

UI/UX Developer

2019 - 2021

- Led UI/UX design for 5+ product features across web and mobile, owning the full cycle from user research through usability testing.
- Redesigned the core user flow for the flagship product, reducing task-completion time by 30% based on post-launch tests.
- Conducted 20+ user interviews and feedback sessions that directly informed design decisions and improved satisfaction scores.
- Wrote production-ready front-end code (HTML, CSS, JS) and ensured pixel-perfect implementation across all breakpoints.
